

DRAFT Guideline

Subject: Foreign Entities Operating in Canada on a Branch Basis

Category: Sound Business and Financial Practices

No: E-4

Date: October 2020

I. Purpose and Scope of the Guideline

This guideline communicates OSFI's expectations with respect to foreign entities operating in Canada on a branch basis (Branches).¹

A Branch is not a separate legal entity; rather, the Canadian branch is an extension or presence of the foreign entity in Canada. OSFI is not the solvency regulator of the foreign entity as a whole; OSFI supervises the foreign entity's business in Canada, including compliance with the requirements of the *Bank Act* (BA) and the *Insurance Companies Act* (ICA), and applicable OSFI guidance.²

As part of its [Supervisory Framework](#), OSFI evaluates Branch operations in accordance with the statutory regimes set out in the BA and ICA, and against the expectations set out in this guideline and other applicable OSFI guidance.

¹ For greater certainty, the terms "foreign entity" and "foreign entities" refer to both banks that carry on business in Canada, and foreign entities that insure in Canada risks, on a branch basis under Part XII.1 of the BA and Part XIII of the ICA, respectively.

² This guideline complements legislative and regulatory requirements in the BA and ICA, and the expectations set out in other relevant OSFI guidance documents (e.g., guidelines, advisories, rulings), applicable to Branches.

II. Branch Management

Branch Management is composed of individuals who have the authority and responsibility of overseeing the business in Canada for, or on behalf of, the foreign entity. This may include the chief agent of a foreign insurance Branch or the principal officer of a foreign bank Branch, and senior officers of the foreign entity located in or outside Canada.³ OSFI expects the composition of Branch Management to be commensurate with the overall size and complexity of the foreign entity's federally regulated business in Canada.

OSFI expects Branch Management to be responsible for the effective implementation and oversight of:

- Business objectives, strategies and plans specific to the business in Canada;
- Risk management policies and procedures tailored for the size, nature, complexity of operations, and risk profile of the Branch's operations⁴;
- Controls to manage the risks pertaining to the business in Canada;
- Policies and procedures to manage the assets and liabilities recorded on the Branch's books and related accounts; and
- Independent assessments of the adequacy and effectiveness of the controls, policies and procedures referenced above⁵.

In order to conduct the above activities, Branch Management is expected to have a thorough understanding of all applicable Canadian legislation, regulations, guidelines and any other supervisory or regulatory matters related to the foreign entity's federally regulated business in Canada carried on through the Branch. Branch Management should also receive sufficiently comprehensive and frequent reports to satisfy these expectations.

³ The ICA and the BA contain requirements with regards to the appointment of a chief agent or principal officer, respectively, through a power of attorney. Through this appointment, the chief agent or principal officer, as the case may be, must be the foreign entity's legal agent in Canada for the receipt of notices from the Superintendent and Minister, as well as any other legal documents.

⁴ The policies and procedures should include, among other elements, appropriate goals, benchmarks, parameters and limits as to the amount of risk related to the business in Canada that the foreign entity is willing to accept.

⁵ Independent assessment may be obtained from individuals or groups designated with that role, such as internal audit or risk management (either at the Branch or the foreign entity's home office), or qualified third parties. Branch Management should be cognizant of any assessments conducted by the foreign entity's home office relevant to the Canadian business and any resulting implications.

OSFI expects Branch Management to have a comprehensive, in-depth understanding of the foreign entity's federally regulated business in Canada carried on through the Branch. OSFI expects Branch Management to be responsible for, and have the necessary authority to carry out, the overall management of that business in Canada. In conducting its oversight activities, Branch Management should be satisfied that strategies, business plans, and policies are appropriate for the business in Canada and comply with relevant Canadian regulatory requirements.

III. Administration of the Business in Canada

A. Arrangements with the Foreign Entity's Home Office

In situations where the foreign entity's home office performs material functions on behalf of the Branch, either directly or through its own outsourcing arrangements, OSFI expects Branch Management to document such arrangements with the foreign entity's home office in written service level agreements.⁶

In particular, any arrangements that involve the flow of funds between the foreign entity's home office and its Branch should be clearly documented. The details of such arrangements should be provided to OSFI. Branch Management should provide OSFI with 30-days advance notice of any proposed fund transfer(s), or series of proposed fund transfers, to the foreign entity's home office that materially deviate from the documented process provided to OSFI.

B. Record Keeping

The ICA and BA contain requirements with respect to certain records that Branches must prepare and maintain regarding their business in Canada (the Records).

OSFI expects the Records to be updated and accurate as at the end of each business day, and that the Records will be sufficiently detailed to enable:

1. OSFI to conduct an examination and inquiry into the business of the Branch;
2. OSFI to manage the Branch's assets, prior to the appointment of a liquidator, should the Superintendent take control of the Branch's assets in Canada; and
3. The liquidator to conduct an effective liquidation of the Branch's assets in Canada.

Electronic Records must be capable of being reproduced in intelligible written form within a reasonable period of time. OSFI expects electronic Records to be accessible and intelligible without incurring additional costs and using readily available commercial applications. For certain types of information, such as reinsurance arrangements or files on more complex

⁶ These written service level agreements should incorporate the contract for services elements outlined in [Guideline B-10 Outsourcing of Business Activities, Functions and Processes](#).

activities, reproduced electronic records may not be sufficient for OSFI's review. OSFI may request that the original hard copy be available at the Branch in Canada, as needed.

Branches under the BA are required to keep copies of the Records at the principal office in Canada of the authorized foreign bank, or at any other place in Canada that the principal officer thinks fit. Branches under the ICA are required to keep copies of the Records at the chief agency of the foreign company in Canada. If the Records are in electronic form, complete copies must be kept on a computer server physically located at the places stipulated in the BA and ICA.⁷

Certain Branches under the BA and ICA are exempted from the requirement to keep copies of the Records at the above noted places in Canada. In those circumstances, the Branch must provide OSFI with immediate, direct, complete and ongoing access to the Records that are stored outside Canada.

IV. Supervision of Branches

The home country regulator of the foreign entity is the primary regulator. OSFI's supervisory role is limited to the foreign entity's federally regulated business in Canada.

A. OSFI's Supervisory Assessment

OSFI supervises the foreign entity's business in Canada, including compliance with the requirements of the BA and ICA, and applicable OSFI guidance. OSFI will undertake a number of activities, including discussions with Branch Management, in order to assess the adequacy of the management and oversight of the foreign entity's federally regulated business in Canada.

The foreign entity, through its designated Branch Management, is ultimately accountable to OSFI for its federally regulated business in Canada, as well as its compliance with Canadian federal legislative and regulatory requirements. OSFI expects Branch Management to be knowledgeable of the results of OSFI's supervisory work and to develop and oversee an appropriate response to any supervisory expectations.

Open communication between Branch Management and OSFI, on an ongoing basis, helps promote the mutual trust and confidence essential for OSFI's approach to supervision to be effective. Accordingly, OSFI expects to be promptly notified of substantive issues and changes affecting the management and operations of the Branch.

OSFI expects Branch Management to respond to all communications and requests for information from OSFI in a timely and thorough manner.

⁷ Please see ss. 597(2) of the BA, and ss. 647(3) of the ICA.

B. Changes to Members of Branch Management

OSFI expects the foreign entity to notify OSFI, as early as possible in the process, of any potential changes to the members of Branch Management, and any circumstances that may adversely affect their suitability.

Information regarding the qualifications of Branch Management should be provided to OSFI.

C. Legislative Requirements and Supervisory Expectations

OSFI expects all foreign entities operating in Canada on a Branch basis to, at all times, remain in compliance with the legislative requirements of the BA and ICA, and the supervisory and regulatory expectations set out in this Guideline, and all other applicable OSFI guidance.

Where these requirements and expectations are not, in OSFI's view, being satisfied by the foreign entity, OSFI may apply additional supervisory and regulatory measures to the foreign entity in respect of its Branch.
