**Title** Deferral of the public consultation on Guideline B-15 disclosure expectation for financed emissions related to off-balance sheet assets under management

**Date** January 29, 2026

**Sector** Banks  
Life Insurance and Fraternal Companies  
Property and Casualty Companies  
Trust and Loan Companies

---

On January 8, 2026, we paused the planned [public consultation](#) on the disclosure expectation for financed emissions related to off-balance sheet assets under management (AUM) under [Guideline B-15](#). In line with this pause, we will also defer the implementation for this expectation to a future date. We have reflected this change in Annex 2-2 of the guideline.

Financial institutions are still expected to quantify and manage their climate-related transition risks, including for off-balance sheet AUM. The deferral of the disclosure expectation allows financial institutions time to strengthen data collection and measurement. We will continue to monitor progress through our supervisory channels.
